

WHITE PAPER

WHITEPAPER

We are pleased to welcome you into the GnG Verse!

On behalf of the whole GnG Verse team, we appreciate your precious time and interest. We are already delighted to meet you!

In this Whitepaper,
you will have the chance to get to know more about our project and team,
as we will be outlining our vision for the future of the project.

WHAT IS GNG VERSE?

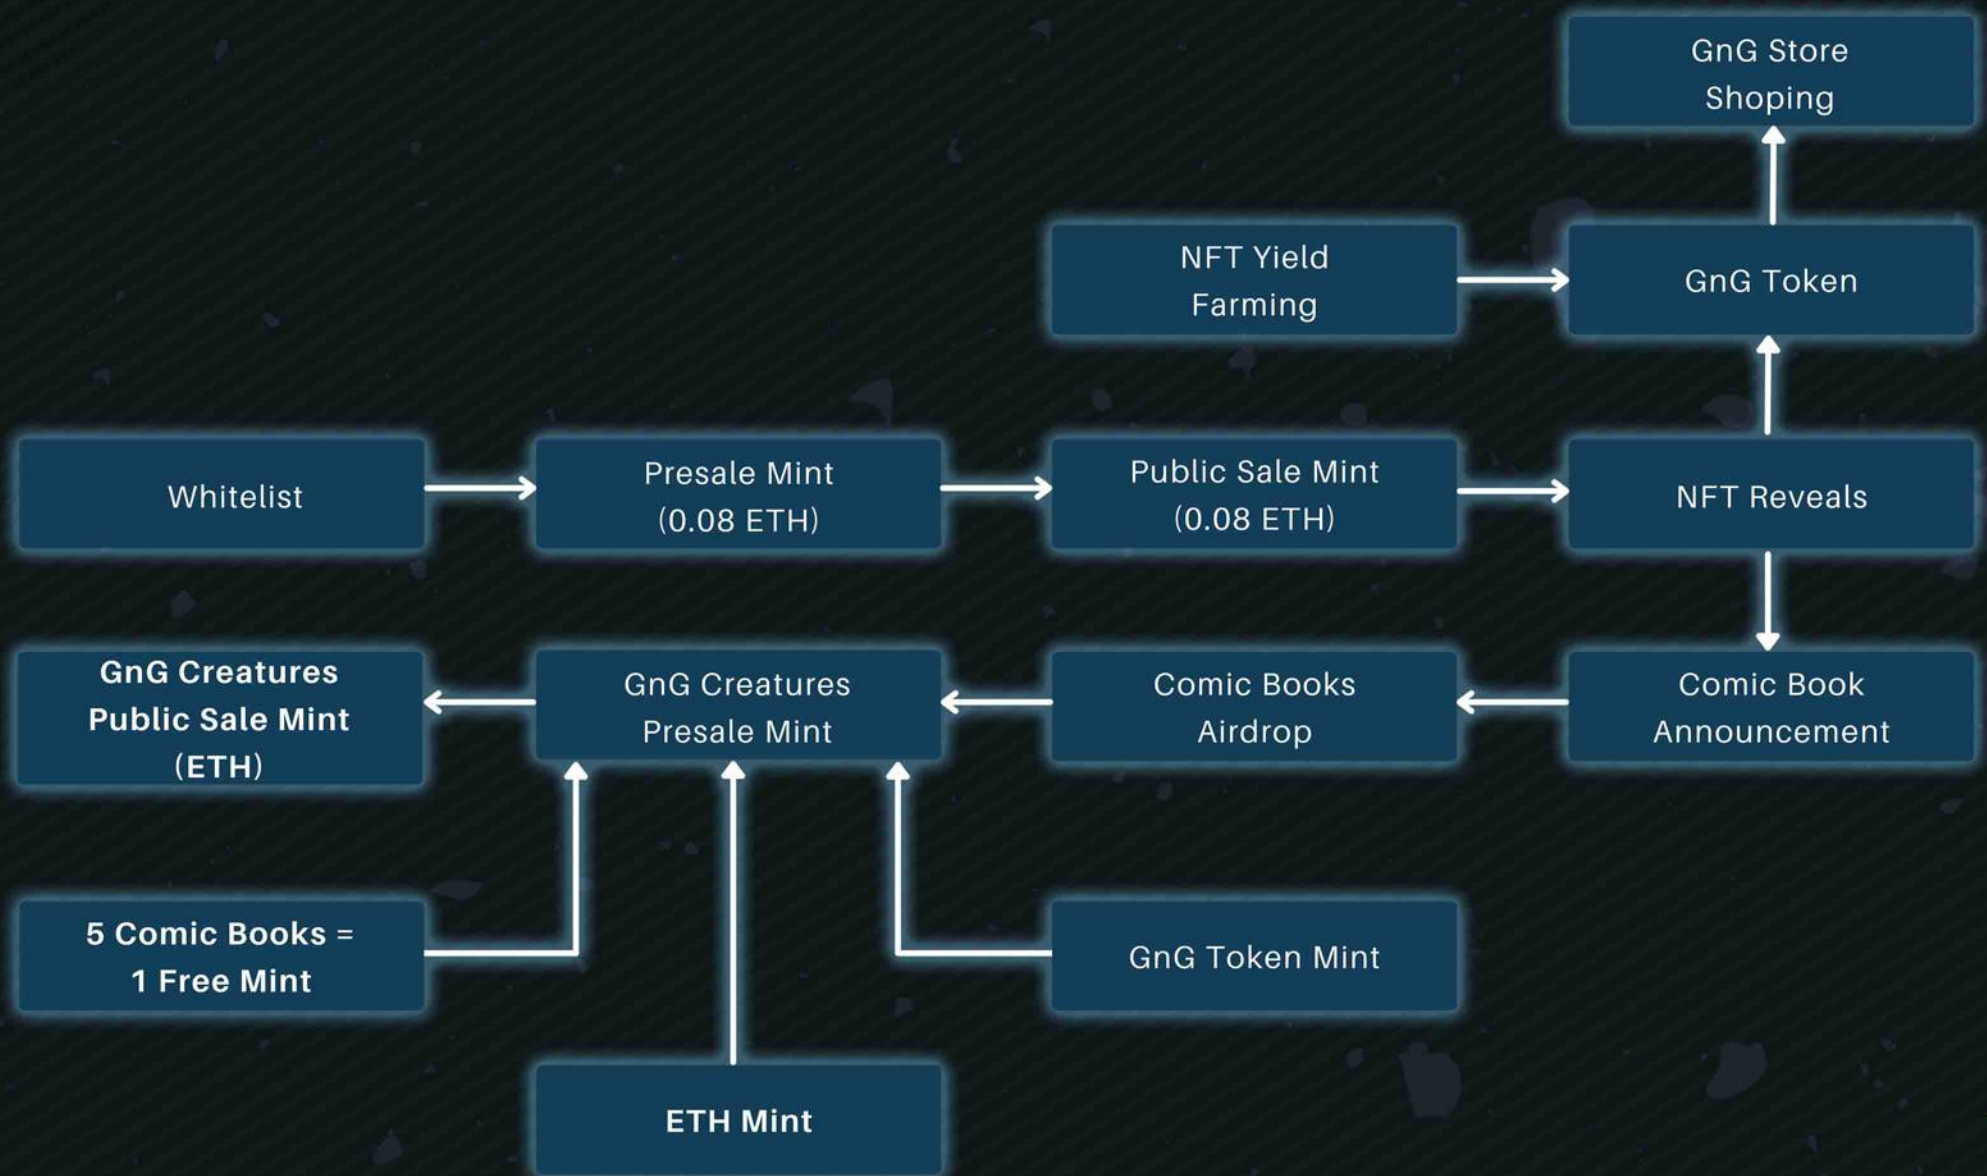

- GnG Verse, or the Goblins and Gnomes Verse, is an NFT project that was created in 2022, by a group of fiction lovers and bookworms with a clear vision in mind.
 - Our NFT collection consists of 5,000 pieces that depict the characters in our exclusive book, The Light of Sorbon.
 - The 5,000 pieces are split in half, with 2,500 pieces for each character; the Gnomes and the Goblins.
 - Our exclusive book is written by our very valuable and experienced writer, and it focuses on the battle of two races that takes place in ancient times.
- (You can access the introduction part of our story via Medium, and the Trailer is available on our Discord server.)

- By purchasing one of the GnG Verse NFTs, you can own one character in the Light of Sorbon universe, become a part of the adventure, and have the chance to shape Alas and Arya's quest to find the Light, as well as the overall story.
- After the minting process is done and every member of our community each has his/her own unique role, the rest of the story will be delivered to our holders as comic book pages, converted into NFTs. This way, our community members will have the exclusive chance to know more about the characters they own and the universe that is masterfully crafted by our beloved writer.
- As the story progresses and events begin to take shape, our dear community members, who have become the "holders" at this point, will have the chance to express their opinions through our "Council Meetings". The story will progress according to the consensus of our holders.

GNG VERSE ROADMAP AND UTILITIES:

- **Amazing artwork:** Although we agree on the fact that all art is indeed valuable, we insist that you will be amazed upon visiting gngverse.com. We believe that one of the many strengths of the GnG Verse project is our beloved art team, which consists of 4 members. Our belief is that this is one of the many positives that distinguishes the GnG Verse from its peers as an outstanding NFT project and makes it potentially an excellent investment.
- **GnG Token:** The GnG Verse holders will be receiving a daily community token named the GnG Token. (Ethereum Offchain ERC20)
- **Comics Launch:** Our exclusive book, The Light of Sorbon, is a very detailed and elaborate piece of art that includes the Goblins, the Gnomes, and even the Ancient World itself! We will be Airdropping NFTs that are converted from comic book pages, that will include the events that take place in our universe, including the missions and the developments of our holders' owned characters in chapters. This allows our dear holders to be able to access these NFTs without having to pay the gas fee. Depending upon your choice, you will have the option to either sell the NFTs you own, or you could hold onto them and have the privilege of free minting through our GnG Creatures collection!

- **GnG Merch:** The exclusive GnG merch would only be purchased in exchange for the GnG Token. Our exclusive merch consists of t-shirts, hoodies, hats, and many more items.
- **GnG Shop:** Aside from the GnG merch, you could also purchase 3D NFT figurines, the Light of Sorbon comic book, and many more items that are accessible via global shopping through our GnG shop. Needless to say, these would also be purchased via GnG Tokens.
- **GnG Creatures:** The GnG creatures include many creatures that are as dangerous as they are mysterious. A few examples would be dragons, ogres, and gigantic aquatic creatures that exist within the GnG Verse, waiting to be discovered by our dear community holders. Our main characters Arya and Alas had only scraped the surface of the inhabitants of the GnG Verse, as even they were able to tame only a few of these. Our GnG Verse holders will have the limited chance to mint these without having to pay a fee!

WHO ARE WE?

- **Goblin Chieftain a.k.a Ash Satoshi:** The head of the entire project, it all started when he invested in Bitcoin in early 2020. After a while, our visionary leader had already become familiar with the dynamics of the Crypto world. It didn't take a whole year for him to quit his day-to-day job, as during the late 2020's he was already a full-time crypto investor as a freelancer, which, he claims, changed his life. He began to extend his network with people from different places of the world, all the while learning from every single one of them. This resulted in his involvement with the NFTs! He had already made up his mind that the NFTs were the Crypto 2.0 after his first NFT investment, the MekaVerse, in August 2020. Although believing that the future of the NFTs was bright, he felt that the current NFTs lack something of utmost importance: A vision. His own vision, however, was already shaped by the belief that an integral part of the NFTs would be their stories. With an outstanding vision and an unshakeable belief, our project leader considers the GnG Verse to be a game-changer.

- **Sefa.eth a.k.a Sefa Çevik:** The mastermind behind the GnG shop, he is a businessman who currently resides in Miami, USA. Concluding business worldwide for over 6 years, he is heavily invested in Crypto and NFTs. He continues to lead us with his experience and know-how.
- **Goblinwiser, also known as Robin Saban:** If you are interested in cinema, you might have heard his name. A veteran of Hollywood, he is the founder of the International Student Film Festival Hollywood. He is also currently a political writer and he happens to be the most experienced member of our GnG Verse team. Impressed by our artistic vision, he is one of the masterminds of our beloved project.
- **Gnomen, or The Whale:** A financial genius, he has the skill of a Wall Street broker. Some also know him as Gnomen aka 150x. He is the guy who you ask where to buy bitcoin, and which NFT projects you should invest in. He specializes in potential investment opportunities. The fact that he is a member of our team should tell you all about our confidence. And we are very proud of that.

- **Dziga, also known as The Storyteller:** The sole writer of the Light of Sorbon epic, he is a very precious team member. Our entire GnG Verse and its lore hang at his fingertips. He is responsible for creating tens of creations that ended up as movies. The fact that some members of our team went as far as putting him just below Tolkien and George RR Martin should tell you all you want to know.
- **Gnome Da Vinci, or The Talent:** As her name suggests, she is responsible for creating the designs that we are incredibly proud of. Our NFT project, the GnG Verse stands out with its artistic approach, and we owe her that. The head of our art department, we like to call her the woman who draws our dreams.
- **Goblindore64 and GnomeTx, also known as the Genius Brothers:** You thought the Coen Brothers were the only geniuses? Wait until you see the work of our developers. Although not technically brothers, we are having a hard time separating them from each other. They are responsible for all things software, from the design of our website to the development of our smart contracts. If The Talent is Da Vinci, these two combined are Michelangelo.
- We would also give our special thanks to Vo Nha, Lorena Mifsud, Jonathan Shaffer, our moderators, directors, and many more people that are working so hard behind the curtains!

WHAT IS THE GNG VERSE ECOSYSTEM LIKE?
